

TARNEO

CONSULTANTS

Engineering the Supply Chain for EV & Solar Infrastructure

EPCs · OEMs · Infrastructure Developers

TARNEO
CONSULTANTS

SOLAR INFRASTRUCTURE · EV · EXPORT

Clean Energy is Growing. Execution is Breaking.

Fragmented Sourcing

No single reliable supply partner across regions and project types.

Quality Gaps

Components arrive out of spec, non-compliant, or untested for deployment.

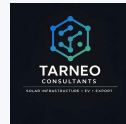

Deployment Delays

Logistics, compliance, and documentation — disconnected and slow.

The supply chain wasn't built for today's energy scale. Tarneo was.

Built for Execution. Not Just Supply.

Tarneo is an engineering-led supply partner for EV and solar infrastructure — delivering deployment-ready components with speed, compliance, and precision across global markets.

4

Markets

India · ME · Africa · SEA

3

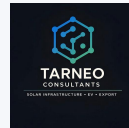

Verticals

EV · Solar · Industrial

"We don't just supply — we enable execution."

The Right Parts. For the Right Projects.

EV Infrastructure

- Charging connectors & assemblies
- EV-grade cables & accessories
- Wiring harnesses (build-to-spec)

Solar Components

- MC4 connectors (IEC 62852 / UL 6703)
- DC cables & junction solutions
- PV junction boxes (UL 3730)

Custom Supply

- OEM-aligned sourcing
- Project-specific configurations
- Pilot to large-scale volumes

Designed for compliance, scalability, and deployment efficiency

Not a Catalogue. A Partner.

Engineering-Led

Supply aligned to real project needs — not price-led catalogue trading.

EV + Solar Under One Roof

Cross-sector advantage most competitors simply don't have.

Export-Ready Execution

Documentation, compliance, packaging, logistics — all handled end-to-end.

OEM-Grade Ecosystem

Verified manufacturers, custom configs, zero shortcuts on quality.

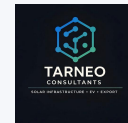

Pilot to Scale

We grow with your project — from trial orders to full-scale rollouts.

Built for the People Building Infrastructure

EPCs

Engineering, Procurement & Construction

Execution-ready supply with full documentation, compliance support, and scalable volumes matched to project timelines.

OEMs

Original Equipment Manufacturers

Custom-configured, manufacturing-aligned components built to your spec — consistent quality at any volume.

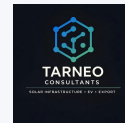

Infrastructure Developers

Utilities & Project Developers

Scalable, certified supply for large rollouts across multiple geographies and regulatory environments.

Trusted. Certified. Ready to Ship Globally.

COMPANY CREDENTIALS

IEC Registered

MSME Registered

LEI Certified

DPIIT Recognized

PRODUCT COMPLIANCE

RoHS

REACH

IEC

TUV

UL Standards

Every component we supply meets the standards your project demands — globally.

We Don't Just Promise. We Deliver.

XVIDIA Technologies Middle East

MC4 connectors + DC cables for EV & Solar infrastructure

Results:

- ✓ Reduced procurement delays
- ✓ Reliable connectivity
- ✓ Smooth project rollout

Connate Global International

Solar connector sourcing + end-to-end delivery coordination

Results:

- ✓ On-time execution
- ✓ Cost Optimization
- ✓ Faster project completion

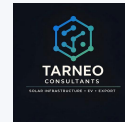

Indioz Consultants India

Solar kits + EV battery components + integrated support

Results:

- ✓ 3 MW solar deployment
- ✓ 40% growth in client acquisition
- ✓ Full integrated support

Growing Markets. Ready Supply.

EV Charging Networks

Public & private infrastructure expansion across urban and highway corridors.

Solar Utility Projects

EPC and utility-scale solar BOS supply for large MW-level deployments.

Industrial Electrification

Commercial and industrial sites requiring certified electrical supply.

Market Expansion · Client Engagement

A multidisciplinary team built around one goal — reliable infrastructure delivery

Where We're Headed

Expand Global Footprint

Scale EV & solar supply across priority markets in ME, Africa, and SEA.

Deepen OEM Partnerships

Strengthen manufacturing ecosystem and custom supply capabilities.

Grow Certified Coverage

Expand product certification across region-specific compliance requirements.

Evolve Beyond Components

Move from component supplier to integrated infrastructure solutions partner.

**From
Component
Supplier
to
Infrastructure
Partner.**

Reliable Infrastructure Starts with Reliable Supply.
